Please note: The educational scripts are a starting point — happy to adjust to suit your team. All images are **placeholders**; final imagery is produced once content is approved. Days show the suggested weekly rhythm — we can lock to exact calendar dates once you confirm a start date. Filming uses the **CHIEFS framework™** (final page). Each week has a typeable **Notes & sign-off** panel.

Placeholder image — final imagery to be produced after approval

1 Reel 1 — Educational · ~35s · physio to camera

"3 things to STOP doing if you have lower back pain"

FILM · PHYSIO Read straight to camera

"If your lower back's been aching, stop doing these three things today.

One — don't rest in bed for days. Gentle movement settles back pain faster.

Two — don't round your back to lift. Hinge at the hips, keep the load close.

Three — don't ignore pain that travels down your leg. That one we want to assess.

Most back pain improves with the right movement — not rest. Follow for simple tips — and if it's been nagging more than a week or two, book in for a proper look."

On-screen: 1. Don't bed-rest · 2. Hinge, don't round · 3. Leg pain = get checked | same video to Reels · TikTok · Shorts

CTA: Follow for more · Book a physio assessment

3 Story Videos — Point of Difference

Story 1 — Back to what you love · ~12s

VO: "Imagine getting through your day without your back stopping you. At Your Body Hub we build a plan around your body and your goals — not a one-size-fits-all stretch sheet — so you can get back to the things you love." **End card:** "Book your assessment — Your Body Hub, Officer."

Story 2 — The difference + CTA · ~15s

VO: "Every new patient starts with a full assessment — how you move, where you're strong, what's causing the pain. Then a plan built around **you**, backed by our physio, EP & myotherapy team under one roof." **End card:** "Treating the cause, not the symptom — book your assessment."

2 Reel 2 — The Ad · ~35s · direct response

Calling out those in pain → book an assessment

FILM · PHYSIO Read straight to camera

"If you've been living with back, neck or knee pain — and you're tired of pushing through it — this is for you.

Maybe it's stopping you sleeping, or you've stopped doing the things you love. You don't have to keep guessing.

At Your Body Hub we start with a proper assessment — we find what's driving your pain and build a clear plan to get you moving with confidence again.

Book an **initial assessment** with our physio team. No referral needed.

DM us the word 'PHYSIO', or tap Book Now — and let's get you started."

On-screen: In pain? Stop pushing through → Book an assessment → DM "PHYSIO" | same video to Reels · TikTok · Shorts

CTA: DM "PHYSIO" · Book Now — initial assessment

4 Carousel — Educational · 6 slides

"5 signs your back pain needs a physio — not bed rest"

1 · COVER "5 signs your back pain needs a physio (not bed rest) 📌"

2 · SIGN 1 "Lasted more than 1–2 weeks — lingering pain needs the right movement to shift."

3 · SIGN 2 "It travels down your leg — pain, pins & needles or numbness past the knee."

4 · SIGN 3 "It comes back every time — the cause hasn't been addressed, only the symptom."

5 · SIGN 4 "It's changing how you move — guarding can make things worse over time."

6 · CTA "Backs are built to move. → Book a physio assessment at Your Body Hub, Officer."

Week 1 · Notes & Feedback

1 Reel 1 — Educational · ~35s · physio to camera

"Knee arthritis? Why resting it makes it worse"

FILM · PHYSIO Read straight to camera

"If you've got knee arthritis, resting it is often the worst thing you can do. It feels like protecting the joint — but cartilage loves movement. The right loading can reduce pain and stiffness for a lot of people.
Two to start: sit-to-stands and step-ups. Start light, build slowly — stop guessing which exercises are safe for your knee.
Most knee pain improves with the right movement, not rest. Follow for more — and if your knee's bothering you, book a proper assessment."

On-screen: Rest ≠ protection · Cartilage loves movement · Start light, build slow | same video to Reels · TikTok · Shorts

CTA: Follow for more · Book a physio assessment

3 Story Videos — Point of Difference · rehab you can measure

Story 1 — Back to what you love · ~12s

VO: "Picture walking, the stairs, and getting up off the floor without thinking about your knee. At Your Body Hub we build a plan around your knee and your life — so you can get back to what you love, with confidence." End card: "Book your assessment — Your Body Hub, Officer."

Story 2 — The difference + CTA · ~15s

VO: "We **measure** your knee — strength, movement, how it handles load — so we're not guessing when you're ready for sport, work or life." End card: "Rehab you can measure — book your assessment."

2 Reel 2 — The Ad · ~35s · direct response

Knee pain → book an assessment

FILM · PHYSIO Read straight to camera

"If knee pain is stopping you doing what you love — the walks, the stairs, getting off the floor with the grandkids — this is for you.
Maybe you've been told it's 'just wear and tear', or to rest it and hope. You don't have to settle for that. At Your Body Hub we start with a proper assessment — we find what's driving your knee pain and build a clear plan to get you moving with confidence again.
Book an **initial assessment** with our physio team. No referral needed.
DM us the word 'PHYSIO', or tap Book Now — and let's get you moving."

On-screen: Knee pain holding you back? → Book an assessment → DM "PHYSIO" | same video to Reels · TikTok · Shorts

CTA: DM "PHYSIO" · Book Now — initial assessment

4 Carousel — Educational · 6 slides

"Your knee recovery timeline — what to expect after surgery"

- 1 · COVER "Knee surgery? Here's what recovery actually looks like 🙌"
- 2 · WEEKS 0-2 "Settle the swelling, get the knee straight, switch the muscles back on."
- 3 · WEEKS 2-6 "Rebuild range and walking. Progress is gradual — and guided, not rushed."
- 4 · WEEKS 6-12 "Strength work steps up — this is where the long-term result is won."
- 5 · 3 MONTHS+ "Back to sport, work and life — when your knee is ready, not just the calendar."
- 6 · CTA "Every knee is different. → Book a physio assessment at Your Body Hub, Officer."

1 Reel 1 — Educational · ~40s · physio to camera

"The 90-second warm-up that prevents most injuries"

FILM · PHYSIO Read straight to camera

"Most weekend injuries start with skipping this — a proper warm-up takes about 90 seconds. Three moves before you play or train: leg swings, walking lunges with a reach, and a few build-up runs — slow, then quicker. This wakes up the muscles and nervous system so they're ready to fire — not cold and caught off guard. Warm muscles are far harder to strain. Follow for more — and if you keep picking up the same injury, book in and let's find out why."

On-screen: Leg swings · Walking lunges + reach · Build-up runs | same video to Reels · TikTok · Shorts

CTA: Follow for more · Book a physio assessment

3 Story Videos — Point of Difference · we find why it happened

Story 1 — Back to it, and stay there · ~12s

VO: "Picture training, working and playing without that injury holding you back. At Your Body Hub we build a plan around your body and your goals — to get you back to it, and keep you there." **End card:** "Book your assessment — Your Body Hub, Officer."

Story 2 — The difference + CTA · ~15s

VO: "We don't just settle the pain — we screen how you move to find what caused it, so you're less likely to be back with the same injury." **End card:** "Fix the cause, not just the pain — book your assessment."

2 Reel 2 — The Ad · ~35s · direct response

Injured at work or sport → book an assessment

FILM · PHYSIO Read straight to camera

"Picked up an injury — at work, the gym, or on the weekend — and just hoping it settles on its own? Pain that lingers, or the same niggle that keeps coming back, usually means something needs sorting properly. At Your Body Hub we start with a proper assessment and build a clear plan to get you back to training, work and life. Book an **initial assessment** — no referral needed, and we work with WorkCover and TAC claims too. DM us the word 'PHYSIO', or tap Book Now — and let's get you sorted."

On-screen: Injured at work or sport? → Book an assessment → DM "PHYSIO" | same video to Reels · TikTok · Shorts

CTA: DM "PHYSIO" · Book Now — initial assessment

⚠ **Before publishing:** confirm current WorkCover & TAC claim rules — keep wording factual (scheme info only), no eligibility promises.

4 Carousel — Educational · 6 slides

"Desk set-up that saves your neck & back"

1 · **COVER** "Sore neck and back by 3pm? Fix your desk set-up 📌"

2 · **SCREEN** "Top of your screen at eye level — so you're not dropping your head all day."

3 · **CHAIR** "Hips slightly above knees, feet flat, lower back supported."

4 · **KEYBOARD** "Elbows at about 90°, shoulders relaxed — close to you, not reaching."

5 · **MOVE** "The best posture is the next one — stand and move every 30–45 minutes."

6 · **CTA** "Aches that won't budge? → Book a physio assessment at Your Body Hub, Officer."

Week 3 · Notes & Feedback

Placeholder image — final imagery to be produced after approval

1 Reel 1 — Educational · ~40s · physio to camera

"Had a fall? 3 things to do next"

FILM · PHYSIO Read straight to camera

"Had a fall recently — even a small one? Here's what to do next.

One — don't just push through. Pain, swelling or bruising that doesn't settle in a few days is worth getting checked.

Two — keep moving gently where you can, but if you can't put weight on it, or something feels unstable, get it assessed.

Three — don't wait for it to come good on its own. The sooner we assess it, the faster we can settle the pain and rebuild your strength and confidence.

Book in with our physio team, and let's get you back on your feet."

On-screen: 1. Don't push through · 2. Move gently — but get it checked · 3. Don't wait it out | **Safety:** if unsteady, move near a stable surface with someone present

CTA: Follow for more · Book a physio assessment

3 Story Videos — Point of Difference · recovery after a fall

Story 1 — Back on your feet after a fall · ~12s

VO: "A fall can knock your confidence as much as your body. At Your Body Hub we build a plan around you — settling the injury, rebuilding your strength, and getting you moving with confidence again." **End card:** "Book your assessment — Your Body Hub, Officer."

Story 2 — The difference + CTA · ~15s

VO: "We don't just get you over the fall — we assess why it happened, then rebuild your strength and balance so you're less likely to fall again." **End card:** "Recover from a fall — and help prevent the next. Book your assessment."

2 Reel 2 — The Ad · ~35s · direct response

Had a fall? → book an assessment

FILM · PHYSIO Read straight to camera

"Have you had a fall — or a slip or trip that's left you sore or shaken?

It's easy to brush it off, but pain, stiffness or a loss of confidence after a fall are worth getting looked at.

At Your Body Hub we start with a proper assessment — we find what's driving the pain, settle it, and rebuild your strength and balance so you can move with confidence again.

Book an **initial assessment** with our physio team. No referral needed.

DM us the word 'PHYSIO', or tap Book Now — and let's get you back on your feet."

On-screen: Had a fall? → Book an assessment → DM "PHYSIO" | same video to Reels · TikTok · Shorts

CTA: DM "PHYSIO" · Book Now — initial assessment

4 Carousel — Educational · 6 slides

"Had a fall? How physio gets you back on your feet"

1 · **COVER** "Had a fall? Here's how physio helps you recover 🙋"

2 · **ASSESS** "First we assess what's hurt — and what caused the fall in the first place."

3 · **SETTLE** "We settle the pain and swelling, and get you moving safely again."

4 · **REBUILD** "Then we rebuild your strength and balance — the foundations of steady movement."

5 · **CONFIDENCE** "Recovery is physical and mental — we help you move with confidence again."

6 · **CTA** "Had a fall or a near miss? → Book a physio assessment at Your Body Hub, Officer."

Filming reference — the CHIEFS framework™

Use the **CHIEFS framework™** as your on-set guide when filming each video this month. The diagrams show exactly how to frame each shot — six quick checks, from framing to sound, that keep every clip sharp, consistent and confident on camera.

C Chin in the Center

DON'T DROP

Chin level & centred — confident and clear.

H Hand over Head

PALM UP TOP

Leave headroom — a palm fits above the head.

i i-Level Camera

EYES LOCKED

Lens at eye level, eyes to camera.

E Elbows in Frame

NO CROP

Frame wide enough for elbows & gestures.

F Face in the Middle

MONEY SHOT

Face on the vertical centre line.

S Shaka Hands

SOUND POPS

A quick shaka near the mic to check audio.

Month 1 only. Included while the team finds its rhythm; the CHIEFS framework applies every month — we won't repeat it in future packs.
