

LINKEDIN CONTENT PACK · TARA'S PROFILE

Month 2 — LinkedIn

A full month of referrer-focused LinkedIn content spotlighting our dietetics service — a weekly clinical newsletter plus two posts each week, positioning Your Body Hub as the reliable nutrition referral partner for GPs and coordinators in Officer and the south-east.

Newsletters ×4 (weekly)

Posts ×8

Audience: GPs & coordinators

Officer & south-east

Prepared by Ready to Rank · Draft for client sign-off

THE GOAL OF THIS PACK

Position Your Body Hub as the trusted dietetics referral partner for local GPs and NDIS coordinators. The newsletter shows how our APD thinks and works; the posts distribute it and build the relationship. Lead with the referrer's problem (patients given generic advice that didn't work) and the referral pathway — not a sales pitch.

Weekly newsletter LinkedIn post (Tara)

Cadence: 1 newsletter + 2 posts per week — Tuesday (newsletter) · Wednesday & Friday (posts)

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
27 Jul	28 Jul	29 Jul	30 Jul	31 Jul	1	2
Week 1 • Gut Health 3	NEWSLETTER 4 IBS: why fibre advice backfires Subscribe	POST 1 5 Why 'eat more fibre' backfires	6	POST 2 7 when to refer IBS	8	9
Week 2 • Non-Diet Approach 10	NEWSLETTER 11 The non-diet approach Subscribe	POST 1 12 The non-diet approach	13	POST 2 14 Why we don't do meal plans & shame	15	16
Week 3 • Chronic Disease 17	NEWSLETTER 18 Chronic disease & the CDM pathway Subscribe	POST 1 19 Nutrition first-line in chronic disease	20	POST 2 21 Joined-up care under one roof	22	23
Week 4 • Life Stages 24	NEWSLETTER 25 Life stages, NDIS & disordered eating Subscribe	POST 1 26 Dietetics that supports NDIS goals	27	POST 2 28 Month recap + next: Exercise Physiology	29	30
31	1 Sep	2 Sep	3 Sep	4 Sep	5 Sep	6 Sep

Note: A weekly newsletter keeps the dietetics service front-of-mind with referrers; the two posts extend reach and prompt connection. Dates are the recommended cadence and can shift to suit.

IBS and the gut: why "just eat more fibre" often backfires

A WEEKLY CLINICAL NOTE FROM TARA · YOUR BODY HUB, OFFICER

GPs see a steady stream of bloating, IBS and functional gut complaints — and the standard "eat more fibre, drink more water" advice often makes symptoms worse, not better.

The issue is that fibre isn't one thing, and IBS isn't one cause. Loading up on the wrong fibres, or jumping straight to blanket elimination, can backfire.

Our Accredited Practising Dietitian, Stacey, uses an evidence-based approach — a structured, supported low-FODMAP process with proper reintroduction, not an indefinite cut-everything diet — alongside the simple habit changes that resolve a surprising number of cases.

For your patients with persistent gut symptoms, that means fewer wasted weeks and a clearer path.

Post 1 · Wed 5 Aug · newsletter lead

✉ This week's clinical note: **why "just eat more fibre" often backfires for IBS.**

Generic gut advice frequently worsens symptoms — here's the evidence-based alternative our dietitian uses, including a properly supported low-FODMAP process.

If you refer for gut or IBS care, this one's for you. 📧 Read & subscribe — link in comments.

— Tara, Your Body Hub, Officer · **CTA: Subscribe**

Post 2 · Fri 7 Aug · referral guidance

For GPs: when to refer IBS to a dietitian.

If first-line advice hasn't worked, or you're considering low-FODMAP, a structured, supported process with reintroduction gets better, safer results than a patient attempting it alone.

Stacey is an Accredited Practising Dietitian — happy to take those referrals.

The non-diet approach: what it is, and the evidence

A WEEKLY CLINICAL NOTE FROM TARA · YOUR BODY HUB, OFFICER

If you've ever hesitated to give weight-centric advice — because you've seen it not work, or do harm — you're not alone.

The non-diet, Health at Every Size® approach focuses on behaviour, not the scales: regular eating, food variety, and a healthier relationship with food. The evidence shows better engagement, better psychological outcomes, and none of the rebound that comes with restrictive dieting.

Stacey works this way with every patient — sustainable change, no shame, no "good and bad" foods.

For patients stuck in the diet cycle, or where weight talk has stalled the conversation, it's often the reset they need.

Subscribe for a weekly clinical note — happy to talk through a referral. — Tara, Your Body Hub, Officer · CTA: [Subscribe](#)

Post 1 · Wed 12 Aug · newsletter lead

The non-diet approach — what it is, and why it works.

No meal plans and shame, no "good and bad" foods. Just sustainable behaviour change, with better engagement and none of the rebound of restrictive dieting.

This week's clinical note goes deeper. 📖 Read & subscribe — link in comments.

Post 2 · Fri 14 Aug · positioning

Why we don't do "meal plans and shame."

Weight-centric advice often stalls the conversation — or does harm. Stacey's Health at Every Size® approach meets patients where they are and builds change that lasts.

If weight talk has hit a wall with a patient, this is the reset.

Nutrition in chronic disease: the GP Management Plan pathway

A WEEKLY CLINICAL NOTE FROM TARA · YOUR BODY HUB, OFFICER

For patients with type 2 diabetes, cardiovascular risk or other chronic conditions, dietary change is first-line — but "watch your diet" rarely lands on its own.

Under a GP Management Plan, your patients can access subsidised dietitian sessions with Stacey, who translates the clinical goal into a realistic, sustainable plan.

And because our dietetics, physiotherapy and exercise physiology teams work under one roof, nutrition, movement and medical care pull in the same direction — with measurable change and clear reporting back to you.

For your complex and chronic patients, that joined-up pathway is where we add the most value.

Subscribe for a weekly clinical note — and CDM referrals are always welcome. — Tara, Your Body Hub, Officer · **CTA: Subscribe**

Post 1 · Wed 19 Aug · CDM pathway

Nutrition is first-line in chronic disease — but "watch your diet" rarely lands alone.

Under a GP Management Plan, your patients get subsidised dietitian sessions and a realistic plan they'll actually follow. CDM referrals welcome.

This week's note has the pathway. 📄 link in comments.

Dietetics across life stages — and our role in NDIS & disordered eating

A WEEKLY CLINICAL NOTE FROM TARA · YOUR BODY HUB, OFFICER

Nutrition needs shift across a lifetime — fertility and pregnancy, PCOS and menopause, fussy eaters, and older adults at risk of malnutrition. Stacey supports them all with a compassionate, evidence-based approach.

Two areas worth flagging for referrers: we provide dietetics that supports NDIS participant goals, and we offer supportive, non-judgemental care for people with a difficult relationship with food — working within scope and signposting to specialist services where needed.

If you're caring for someone who'd benefit, earlier support is always better.

Subscribe for a weekly clinical note — and reach out anytime. — Tara, Your Body Hub, Officer · **CTA: Subscribe**

Post 1 · Wed 26 Aug · NDIS

For NDIS coordinators: dietetics that supports participant goals.

From mealtime management to chronic conditions and disability-related nutrition, Stacey provides practical, goal-focused support.

Happy to discuss a participant anytime.

— Tara, Your Body Hub, Officer · **CTA: Refer / Connect**

Post 2 · Fri 28 Aug · month recap

That's a wrap on our dietetics series.

Thank you to the GPs and coordinators across Officer, Berwick and Pakenham who trust us with your patients.

Next month we turn to Exercise Physiology — exercise as medicine. Subscribe so you don't miss it.
