Please note: The educational scripts are a starting point — happy to adjust to suit James's voice. All images are **placeholders**; final imagery is produced once content is approved. Days show the suggested weekly rhythm — we can lock to exact calendar dates once you confirm a start date. Exercise-physiology content is general information, not individual medical advice; sensitive weeks (cancer, chronic pain, mental health) lead with care and note that programs are individually assessed and supervised. Each week has a typeable **Notes & sign-off** panel.

1 Reel 1 — Educational · ~40s · James to camera

"Scared of falling? 3 exercises that keep you steady"

FILM · JAMES (EP) Read straight to camera

"Worried about losing your balance as you get older? Here's the good news — balance is trainable at any age. These are three things I start most people on.

One — stand up from a chair without using your hands, a few times a day. That's real-world leg strength.

Two — practise standing on one leg while the kettle boils. Hold the bench if you need to.

Three — walk heel-to-toe in a straight line, like a tightrope.

Do these most days and your steadiness improves. Follow for more, and if your balance has been slipping, come and see me for a proper assessment."

On-screen: 1. Sit-to-stand · 2. Single-leg stand · 3. Heel-to-toe walk | same video to Reels · TikTok · Shorts

3 Story Videos — Point of Difference

Story 1 — Stay independent, doing what you love · ~12s

VO: "Imagine still getting down on the floor with the grandkids, still walking the dog, still doing your own shopping — years from now. James builds a simple strength and balance plan around your life, so you stay confident on your feet and independent for longer." **End card:** "Book with James — Your Body Hub, Officer."

Story 2 — Exercise that's actually prescribed · ~15s

VO: "Here's what we do differently. James is an Accredited Exercise Physiologist — university-qualified in exercise as medicine. Your program is prescribed and progressed for your body, your conditions and your goals, and backed by our whole allied-health team under one roof. Not a generic gym plan — a plan made for you." **End card:** "Move with confidence — book with James."

2 Reel 2 — The Ad · ~35s · direct response

Unsteady on your feet → book with James

FILM · JAMES (EP) Read straight to camera

"If you or someone you love has had a fall — or you've started feeling unsteady on your feet — you don't have to just live with it and hope.

I'm James, the exercise physiologist here at Your Body Hub. I'll assess your strength and balance and build a safe, progressive program to get you steadier and more confident.

Exercise physiology is covered under Medicare care plans, NDIS and most private health funds.

DM me the word 'EP', or tap Book Now — and let's keep you on your feet."

On-screen: Unsteady on your feet? → Book with James → DM "EP" | same video to Reels · TikTok · Shorts

CTA: DM "EP" · Book Now — Medicare, NDIS & private health rebates

4 Carousel — Educational · 6 slides

"Falls aren't just 'part of getting older'"

1 · COVER "Falls aren't just 'part of getting older' 📌"

2 · PREVENTABLE "Many falls are preventable — strength and balance are the biggest levers."

3 · STRENGTH "Leg strength fades from your 50s unless you train it. Sit-to-stands build it back."

4 · BALANCE "Balance is a skill — practise it and it improves, at any age."

5 · CHECK-UP "Vision, footwear and medications matter too — worth reviewing with your GP."

6 · CTA "Want a plan that's right for you? → Book with James, Your Body Hub, Officer."

"Type 2 diabetes? Why exercise is one of your best tools"

FILM · JAMES (EP) Read straight to camera

"If you're managing type 2 diabetes, exercise is one of the most powerful tools you've got — and it's not about punishing yourself at the gym.
Here's why it works: when you move, your muscles pull sugar out of your blood without needing as much insulin — so your levels steady.
Two things make the biggest difference — a bit of strength work twice a week to build sugar-hungry muscle, and a short walk after meals.
Start small, stay consistent. Follow for more, and for a program built around your health, come and see me."

On-screen: Muscles use blood sugar · Strength ×2/week · Walk after meals | Caption: general info, not a substitute for your diabetes care team

CTA: Follow for more · Book with James

3 Story Videos — Point of Difference

Story 1 — Take control of your numbers · ~12s

VO: "Imagine your next check-up going the right way — steadier blood sugar, better blood pressure, more energy — without turning your life upside down. James builds a realistic exercise plan around your condition and what you actually enjoy, so the changes stick." End card: "Book with James — Your Body Hub, Officer."

Story 2 — Joined-up care · ~15s

VO: "Here's what we do differently. As an Accredited Exercise Physiologist, James works with your GP's care plan and alongside our dietitian and physio team — so your movement, nutrition and medical care all pull in the same direction. Exercise, prescribed like medicine." End card: "Joined-up care — book with James."

2 Reel 2 — The Ad · ~35s · direct response

Managing a health condition → book with James

FILM · JAMES (EP) Read straight to camera

"Been told you need to 'get more active' for your diabetes, your heart or your weight — but not sure where to start, or worried about doing it safely?
That's exactly what I'm here for. I'm James, the exercise physiologist at Your Body Hub, and I turn 'exercise more' into a safe, specific plan that fits your body and your life.
With a GP care plan your sessions may be subsidised by Medicare, and we accept NDIS and private health.
DM me the word 'EP', or tap Book Now — and let's take the guesswork out of it."

On-screen: Managing a condition? → Book with James → DM "EP" | same video to Reels · TikTok · Shorts

CTA: DM "EP" · Book Now — Medicare care plans welcome

⚠ Compliance: chronic-disease exercise is general info, not individual medical advice — keep the "see your diabetes/care team" caption; AEP, Medicare CDM & NDIS references are factual. No guaranteed outcomes.

4 Carousel — Educational · 6 slides

"Exercise as medicine — what it does for chronic conditions"

- 1 · COVER "Exercise really is medicine — here's what it does 🦋"
- 2 · DIABETES "Type 2 diabetes: working muscles use blood sugar, steadying your levels."
- 3 · HEART "Heart health: regular movement lowers blood pressure and lifts fitness."
- 4 · WEIGHT & ENERGY "Strength work builds muscle — your body's engine for energy and metabolism."
- 5 · THE DOSE "The dose matters — an EP prescribes the right type and amount for you."
- 6 · CTA "Ready to start safely? → Book with James, Your Body Hub, Officer."

1 Reel 1 — Educational · ~40s · James to camera

"Persistent pain? Why movement is part of the fix"

FILM · JAMES (EP) Read straight to camera

"If you've had pain for months, you've probably been told to rest and avoid what hurts. But for persistent pain, too much rest often makes it worse — your body gets more sensitive and less capable. The way forward is gradual, graded movement: starting well within your limits, and building up so slowly your nervous system stops sounding the alarm. It takes patience, and it works. Follow for more, and if pain's been running your life, let's build a plan that moves you forward."

On-screen: Rest ≠ recovery · Graded movement · Start low, build slow | **Caption:** general info — see your treating team for persistent or new pain

CTA: Follow for more · Book with James

3 Story Videos — Point of Difference

Story 1 — Get your life back, gradually · ~12s

VO: "Imagine doing a little more each week — walking further, sleeping better, getting back to the things pain has taken from you. James builds a gentle, graded program that meets your body where it is today and moves it forward, at a pace that works." **End card:** "Book with James — Your Body Hub, Officer."

Story 2 — Support through treatment & beyond · ~15s

VO: "Here's what we do differently. Whether you're going through cancer treatment, living with chronic fatigue, or rebuilding afterwards, James is an Accredited Exercise Physiologist trained to help you move safely when energy is low — gently rebuilding strength, fitness and confidence, alongside your medical team." **End card:** "You don't have to do it alone — book with James."

2 Reel 2 — The Ad · ~35s · direct response

Pain, fatigue or cancer recovery → book with James

FILM · JAMES (EP) Read straight to camera

"Living with long-term pain or fatigue, or recovering from cancer treatment — and everyday movement feels like too much? You don't have to push through alone, or wait until you 'feel ready'. I'm James, the exercise physiologist at Your Body Hub. I help you move safely when your energy and confidence are low, and rebuild at a pace that suits you. Covered under Medicare care plans, NDIS and most private health funds. DM me the word 'EP', or tap Book Now."

On-screen: Pain, fatigue or recovery? → Book with James → DM "EP" | same video to Reels · TikTok · Shorts

CTA: DM "EP" · Book Now — Medicare, NDIS & private health rebates

⚠ **Compliance:** sensitive week (cancer, chronic pain) — exercise oncology & graded exercise are evidence-based but general info; no cure or outcome claims. Keep the "alongside your medical/treating team" line. Programs individually assessed & supervised.

4 Carousel — Educational · 6 slides

"Why an exercise physiologist for chronic pain & fatigue?"

1 · **COVER** "Pain or fatigue for months? Why an EP can help 🙋"

2 · **THE SCIENCE** "Persistent pain isn't just tissue damage — the nervous system turns up the volume."

3 · **REST BACKFIRES** "Complete rest can backfire — the body gets more sensitive, not less."

4 · **GRADED EXERCISE** "Graded exercise gently retrains your system to feel safe moving again."

5 · **THROUGH TREATMENT** "During cancer treatment, tailored movement can ease fatigue and protect strength."

6 · **CTA** "Ready to move forward? → Book with James, Your Body Hub, Officer."

1 Reel 1 — Educational · ~40s · James to camera

"Living with MS or Parkinson's? Why exercise matters"

FILM · JAMES (EP) Read straight to camera

"If you or someone you support is living with a neurological condition like MS or Parkinson's, exercise isn't just good for general health — it's part of managing the condition itself.

The right program can help with strength, balance, walking and confidence — so you keep doing the things that matter.

The key is that it's tailored and supervised, matched to how you're feeling day to day.

Follow for more, and if you'd like a program built for you, come and see me."

On-screen: Exercise = part of management · Strength · balance · walking · Tailored & supervised | **Caption:** general info — programs are individually assessed & supervised

CTA: Follow for more · Book with James

3 Story Videos — Point of Difference

Story 1 — Support that meets your goals · ~12s

VO: "Whatever you're working towards — moving more easily, staying independent, keeping up with your family — imagine someone who builds the plan around your goals, not a one-size-fits-all program. James gives you supervised, personalised support for where you are right now." **End card:** "Book with James — Your Body Hub, Officer."

Story 2 — Exercise physiology on your NDIS plan · ~15s

VO: "Here's what we do differently. James is an Accredited Exercise Physiologist who works with NDIS participants — practical, goal-focused sessions that support your plan, whether that's mobility, strength, independence or wellbeing. And you've got our whole allied-health team behind you, under one roof." **End card:** "On an NDIS plan? Book with James."

2 Reel 2 — The Ad · ~35s · direct response

NDIS & complex conditions → book with James

FILM · JAMES (EP) Read straight to camera

"Living with a disability, a neurological condition, or a mental-health challenge — and want to move more, but safely and with the right support?

I'm James, the exercise physiologist here at Your Body Hub. I work with NDIS participants and complex conditions to build practical, goal-focused programs that support your plan and your life.

No judgement, and never pushing you past what's right for you.

We accept NDIS, Medicare care plans and private health. DM me the word 'EP', or tap Book Now."

On-screen: NDIS or complex condition? → Book with James → DM "EP" | same video to Reels · TikTok · Shorts

CTA: DM "EP" · Book Now — NDIS, Medicare & private health

⚠ **Compliance:** disability, neurological & mental-health content — lead with respect and care, no outcome guarantees; NDIS & AEP references are factual; programs individually assessed & supervised.

4 Carousel — Educational · 6 slides

"Exercise physiology & your NDIS plan"

1 · **COVER** "Exercise physiology on an NDIS plan — how it works 🙌"

2 · **GOALS** "EP supports mobility, strength, independence and wellbeing goals."

3 · **TAILORED** "Programs are individually assessed and supervised — matched to you."

4 · **COMPLEX NEEDS** "Well-suited to neurological conditions, disability and complex health needs."

5 · **TEAM** "Your EP can work alongside your support team and other therapists."

6 · **CTA** "Want to use your plan for EP? → Book with James, Your Body Hub, Officer."
